2

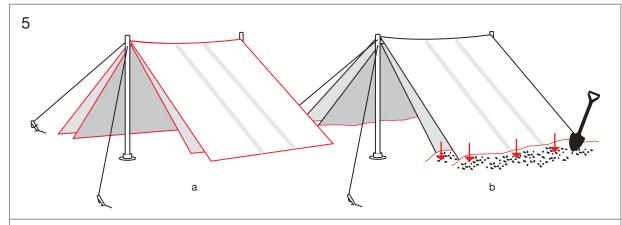

Assemble the poles.

Fix the ropes to the poles

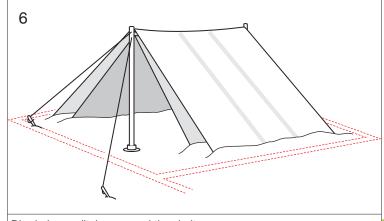

- a. Take the 9m piece and pass through the holes at the top to create a double bridge between the poles
- b. Tie the each piece of 6m rope to create a V-shape to fixate the structure
- c. Fix the ropes to the pegs.

Peg the ropes to the ground- use the tarpaulin sheets to measure 4m between the poles.

- a. Tie the two tarpaulins to the poles with the remaining pieces of rope
- b. Bury the sides into the ground, using stones and mud to reinforce the structure.

Dig drainage ditches around the shelter.
